### ***Hampton Company Awarded \$88 Million Contract by the U.S. Army***

Hampton based **Science and Technology Corporation (STC®)** has been awarded the ATC Data Services Contract by the Aberdeen Test Center (ATC) of the U.S. Army at Aberdeen Proving Grounds, Maryland. This contract has an estimated value of \$88 million over five years. Jacobs Sverdrup, one of the leading U.S. technology companies, is a major subcontractor on this award. STC was recently in the news when it was awarded the NASA Langley Electronics Fabrication Services (EFS) Contract.

Established in 1979, STC is a certified Small and Disadvantaged Business with about 400 employees at 15 locations in the U.S. STC has steadily expanded its multidisciplinary science, technology and management support services to the U.S. government agencies, including NASA, DOD, NOAA, EPA and FAA and WMO/GEWEX.

Under this contract the STC team will provide the complete range of data collection and management services for all the tests conducted by the U.S. Army at the Aberdeen Test Center.

The team will also responsible for maintaining the computers, systems and network and for providing the Help Desk support. The ATC Data Services contract will help enhance the rapidly increasing volume of Information Technology services being provided by STC.
